THE DEMAND OF THE WEST.

In the course of some remarks at the recent session of the National Irrigation Congress Judge W. H. Stilwell, of Phoenix, said:

"Congress has been making appropriations for rivers and harbor improvements. But excepting the appropriation which congress has made for agricultural colleges the farmer has received comparatively little consideration. A strong reason why the federal government should attend to the distribution of its waters is that in many cases reservoirs would have to be built in one state for the purpose of conserving and holding water for distribution in another state. The federal government alone is in a position to do such work. I am in favor of the government retaining its public land, selling it as it has always sold it—to the homeseeker; conserving the water so that it may be distributed to the irrigator for the lowest possible price and the profit to be realized from the cultivation of the soil secured to the home builder rather than to corporations formed to sell water to farmers."

It requires a better government and a stronger nation to preserve peace than to declare war. Peaceful conquests surpass the most glorious pages of history.

The assignment of Rear Admiral Sampson to the Boston navy yard will net him a total of \$7,765 per annum, counting shore duty pay and allowance. Admiral Schley at sea, without perquisites, will receive \$7,500.

Three powerful syndicates in the City of Mexico are engaged in a merry war over street transportation. One of them is an American, another an English and the third a South African syndicate. When such a fight comes to pass average people are like a crowd at a dog fight—they are reluctant to spoil sport.

The Secretary of war does well in taking steps toward a reorganization of the army with the purpose of making it a more perfect piece of governmental machinery. The main thought to be kept in mind in the contemplated reforms is that special services require special men, and that the more highly the staff and line officers are specialized the better will be the results for the army.

A TRUTH statement never was made than that recently published by the McLeansboro, Ohio, Times, when it said: "There is prosperity in the country, but unfortunately it is confined to the men with money. Those without it have seldom, as a whole, been worse off. Even if they are employed, the cost of living is so great, so disproportionate to the scale of wages paid that they find it almost impossible to make ends meet. These men begin to anxiously ask what is to become of them."

To prevent poverty all must have an even start in the race of life. Lands must be free, tools free and money free. "But there will be poor people still," will be said. So there may be—resulting, however, from natural defects of human character and physical disability; and these it is the bounden duty of society to make good so far as may be done. All artificial hindrances to equality removed, the natural may be provided against by social arrangements made in accordance with the Golden Rule. The Master went about "doing good." That is to say, rectifying the evils that had resulted from natural causes, hindrances, lameness and sickness. But He also "fed the hungry."

During the winter of 1897 Mr. James Reed, one of the leading citizens and merchants of Clay, Clay Co., W. Va., struck his leg against a cake of ice in such a manner as to bruise it severely. It became very much swollen and pained him so badly that he could not walk without the aid of crutches. He was treated by physicians, also used several kinds of liniment and two and a half gallons of whisky in bathing it, but nothing gave any relief until he began using Chamberlain's Pain Balm. This brought almost a complete cure in a week's time and he believes that had he not used this remedy, his leg would have had to be amputated. Pain Balm is unequalled for sprains, bruises and rheumatism. For sale by all drug stores.

Eczema!  
The Only Cure.

Eczema is more than a skin disease, and no skin remedies can cure it. The doctors are unable to effect a cure, and their mineral mixtures are damaging to the most powerful constitution. The whole trouble is in the blood, and Swift's Specific is the only remedy which can reach such deep-seated blood diseases.

Eczema broke out on my daughter, and continued to spread until her head was entirely covered. She was treated by several good doctors, but grew worse, and the dreadful disease spread to her face. She was taken to two celebrated health springs, but received no benefit. Many patent medicines were taken, but without result, until we decided to try S. S. S., and by the time the first bottle was finished, her head began to heal. A dozen bottles cured her completely and left her skin perfectly smooth. She is now sixteen years old, and has a magnificent growth of hair. Not a sign of the dreadful disease has ever returned.

H. T. SNOW,  
2704 Lucas Ave., St. Louis, Mo.

Don't expect local applications of soaps and salves to cure Eczema. They reach only the surface, while the disease comes from within. Swift's Specific

S. S. S. For Blood

is the only cure and will reach the most obstinate case. It is far ahead of all similar remedies, because it cures cases which are beyond their reach. S. S. S. is purely vegetable, and is the only blood remedy guaranteed to contain no potash, mercury or other mineral.

Books mailed free by Swift Specific Company, Atlanta, Georgia.

SOUTHWESTERN BUSINESS COLLEGE.

El Paso, Texas.

The modern business training school of the Southwest.

Our COURSES: Business and Shorthand embracing bookkeeping, arithmetic, commercial law, business writing, spelling, letter writing, rapid calculating, business papers and legal forms, shorthand, typewriting, office training in retailing, wholesaling, commission, banking by actual business practice.

We offer the superior advantage of splendid equipment, and personal instruction under trained specialists. We prepare students for the best position which we secure. "Students" "Business" "In connection with the college" Full Term begins September 1st. Established 1895. E. H. COOK, Prin.

Copper Queen Store.

COPPER IS THE METAL.

The Cochise Copper Mining Company,  
Bisbee, Arizona.

This company owns a very valuable group of mines situated in Warren mining district, county of Cochise, Arizona, lying immediately east of and adjoining the town of Bisbee, and adjoining the property of the Copper Queen Consolidated Mining company on the north. The latter company has been in operation for about twenty years, and employs about 1,500 men daily in the operation of its mammoth mine and smelters, and as a result has produced copper to over 34,000,000 pounds during the year 1898, and the net proceeds of such production are reported to have been over \$2,000,000, and it has been said by experienced miners who have been under its employ for years, that the Queen mine now has sufficient ore in sight to keep it in constant operation for the next twenty years without further development.

Is it not reasonable to believe that the property of the Cochise company is fully as valuable, when it is within such close proximity to such a wonderful mine?

The blasts set off in the underground workings of the Queen property can easily be felt and heard at the shaft of our mine, and oftentimes the concussion has attracted marked attention.

The original owners of these valuable mines are local business men, well and favorably known in Bisbee and surrounding vicinity, who are doing their utmost to make this enterprise a success in every respect. The board of directors are original owners, and are donating their services to the company until such time as the mine will pay dividends. They own the controlling interest in this property, and as a protection to stockholders have placed their entire interest in escrow for a term of one year.

The stock books of our company are now open for subscriptions, and a limited number of shares are offered at ten cents per share. No application for less than 100 shares will be accepted.

The company reserve the right at any time to advance the price of shares without further notice, or to reject any application for stock at their discretion.

Every cent received from the sale of stock will be expended toward the development of our property and the erection of hoisting works, and all other necessary improvements, and to make our enterprise a success in every particular.

We invite investigators and their experts or their engineers to closely scrutinize our property.

Applications for shares may be made to any of the directors of the company, or to any of our legally authorized representatives.
